Applicant's election of Group I, claim 6, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 6 is rejected under 35 U.S.C. 102(a) as being clearly anticipated by JP 08-296835.

JP 08-296835 discloses a pulverized coal fired thermal power generation system comprising a boiler (9) for burning pulverized coal, an air heater (14) for effecting heat exchange between combustion exhaust gas from said coal-fired boiler and combustion air for said coal-fired boiler, and a dryer (3) for drying coal by feeding thereto the combustion exhaust gas having passed through said air heater.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
